COLOR PRESERVATION:

Dried Apples are available with sodium sulfite, natural (no treatment to preserve color), treated with ascorbic or erythorbic acid and citric acid blend of antioxidants, or sea salt, lemon juice concentrate and molasses.

UNIQUE CHARACTERISTICS OFFER GREAT TASTE AND EXCELLENT TEXTURE

Every product Tree Top makes is with our customer in mind. We work closely with product developers to design the optimum ingredient for any finished product. That's true for Dried Apples and our entire array of fruit ingredients. Our customers rely on Tree Top's technology, personalized service, and years of experience to develop products that meet their specific needs. Items shown are not inclusive of all products available, but are a reference for size and show a sample of our diversified product offerings. Regular or evaporated apples are dried to a variety of moisture levels ranging from 14% to 26% H₂O, depending on the product. Low Moisture is further dried to less than 3.5% H₂O.

To locate applications using Low or Regular Moisture Apples on our website, simply visit treetoppingredients.com, click on the Applications tab, then use the Application Finder to search hundreds of innovative application formulations.
